Summer 2007

The Design-Build Approach

D&M Industries opened for business in its new 70,000-square-foot Moorhead, Minnesota, facility in March 2007. The new structure is a major upgrade from the four smaller buildings that housed its operations a year before.

D&M Industries is a regional supplier of doors, hardware, windows and millwork. When the company decided to

combine all its functions in a single facility, it looked to Olaf Anderson & Son to guide them through the design-build process. After drawing and finalizing plans with the Olaf Anderson & Son architects, construction began—and approximately eight months later, D&M Industries

had a manufacturing area for its hollow metal doors, warehouse space, offices and residential and commercial showrooms, all under one roof. D&M's own product line is also on permanent display throughout their building.

If you would like to learn how design-build can work for you, contact Jeff, Jed or Troy at Olaf Anderson & Son Construction.
