

Earl's Repair

Another Successful Project

Since 2001, Earl Samuelson has been the busy owner of Earl's Repair in Casselton, N.D. The business' growth has led to the need for a new facility. Employing the design/build process, Olaf Anderson & Son determined that a pre-engineered metal building would be the most cost-effective approach to house Earl's car and light truck repair business.

More than a dozen cars a day run through this five-person shop, and the comment most often heard is how bright and clean the entire facility is.

Earl's Repair at 1250 Front Street in Casselton, N.D. A pre-engineered metal building was determined to be the most cost-effective approach to house Earl's repair business.

Midcontinent Communications, West Fargo, N.D.

Another Successful Project - Design/Build Project

Midcontinent Communications

For more than 60 years, Midcontinent Communications has been connecting North and South Dakota to the rest of the world through local and long distance phone service, and more recently, broadband Internet and digital and high definition television. With the expansion of its services to the West Fargo, N.D., area and in need of a new regional facility, Midcontinent Communications teamed with Olaf Anderson & Son to design and build a new 13,500-square-foot facility.

The new building consists of a large training room, warehouse, uninterrupted power supply room, a general manager's office and an area designed with 10 cubicles. There is also a standby generator to provide temporary power to ensure continuous service to its customers. The heart of the facility is called the Head End Electronics room, which houses all Midcontinent's specialized equipment that makes the Internet, HD television and phone service possible.

Through careful planning, dedication and an excellent working relationship, Olaf Anderson & Son is helping Midcontinent Communications provide quality service for another 60 years.
