

Green Design

With the increase in energy costs, incorporating green design into building construction is becoming much more

Olaf Anderson & Son architect Trent Ochsner became a LEED Accredited Professional last July. LEED AP certification distinguishes building professionals with the knowledge and skills to successfully facilitate the LEED certification process.

cost-effective. The initial added cost associated with building green is offset by lower heating and cooling costs and increased worker productivity. Examples of green building principles encouraged by LEED

include water efficiency, reduced energy consumption, recycled and re-used materials, indoor air quality and on-site renewable energy production (such as solar and wind generators).

Consider building green with Olaf Anderson & Son Construction.

What is LEED®?

The Leadership in Energy and Environmental Design (LEED®) Green Building Rating System™ encourages and accelerates global adoption of sustainable green building and development practices through the creation and implementation of universally understood and accepted tools and performance criteria.

LEED® is a third-party certification program and the nationally accepted benchmark for the design, construction and operation of high performance green buildings. LEED® gives building owners and operators the tools they need to have an immediate and measurable impact on their buildings' performance. LEED® promotes a whole-building approach to sustainability by recognizing performance in five key areas of human and environmental health: sustainable site development, water savings, energy efficiency, materials selection and indoor environmental quality.

Celebrating Two Decades With CECO Building Systems

CECO Building Systems is a market leader in the manufacture of building systems for commercial, industrial, institutional and many other applications. Olaf Anderson & Son Construction Company has been a CECO Builder since 1988 and we are one of CECO's top builders in the Midwest Region. Our projects have received numerous awards for design and workmanship, along with company honors for sales and volume. Call and find out if a CECO Building is right for you.
